ISBN-10: 8536962410

ISBN-13: 9788536962412

Stockley's Drug Interactions is a source book of interactions, their mechanisms, clinical importance and management.

- * Contains detailed yet concise monographs
 - * Covers interactions between therapeutic drugs, proprietary medicines, herbal medicines, foods, drinks, pesticides and drugs of abuse
 - * Based on published sources and fully referenced
 - * Provides comprehensive details of the clinical evidence for the interactions under discussion, an assessment of their clinical importance and gives clear guidance on how to manage the interaction in practice
 - * Contains over 3,400 monographs.
-
- n New for the 9th edition:
 - * Over 300 new monographs
 - * All monographs fully revised and revalidated
 - * Three new chapters on the interactions of Thyroid Hormones, Urological drugs, and Nutritional agents, Supplements and Vitamins
 - * New drugs launched in the last two years added - including drugs such as fesoterodine, several monoclonal antibodies, new antidiabetics (e.g. sitagliptin) new antineoplastics (e.g. dasatinib) and new immunosuppressants (e.g. temsirolimus)
 - * Updated information on seasonal flu vaccines and antivirals, including all available information on possible interactions with concurrent medication
 - * Increased commentary on the involvement of newer mechanisms in drug interactions, such as drug transporter proteins, and other genetic factors that affect the ability of individuals to metabolise medicines
