

Diabetes Management in Primary Care

Offers primary care physicians evidence-based guidelines for evaluating and treating all patients with diabetes.

Source: Lippincott Williams & Wilkins (LWW)

Author(s): Jeff Unger MD

ISBN-10: 0781787629

ISBN-13: 9780781787628

Covers all aspects of outpatient and hospital-based diabetes care for all age groups, and includes behavioral interventions for enhancing patient adherence.

Coverage includes fine-tuning glycemic management with computerized self-blood glucose monitoring software, evaluating and treating patients with metabolic syndrome and polycystic ovary syndrome, managing mental illness in patients with diabetes, and prevention of microvascular and macrovascular complications. The book discusses newer insulin therapy protocols, insulin delivery devices such as pumps, pens, and inhaled insulin, and novel pharmacotherapies including incretin mimetics and DPP-IV inhibitors.

- n Offers primary care physicians evidence-based guidelines for evaluating and treating all patients with diabetes
- n Covers all aspects of outpatient and hospital-based diabetes care
- n A chapter is devoted to diabetes during pregnancy, in children, and in adolescents
- n Includes lifestyle interventions and behavioral interventions for enhancing patient adherence
- n Topics covered include:
 - n Diagnosis and management of the metabolic syndrome
 - n Evaluating and treating patients with polycystic ovary syndrome
 - n Newer insulin therapy protocols
 - n Insulin delivery devices such as pumps, pens, and inhaled insulin
 - n Fine-tuning physiologic insulin replacement with computerized self-blood glucose monitoring software
 - n Novel pharmacotherapies including incretin mimetics and DPP-IV inhibitors
 - n Screening and prevention of microvascular and macrovascular complications
 - n Managing mental illness in patients with diabetes
 - n Each chapter in the book offers "Take Home Points" highlighting the information that is most beneficial
