

Color Atlas of Chemical Peels

This practical and simple guide is the first atlas on chemical peels, representing the state of the art in this field.

Source: Springer Science+Business Media

Author(s): Tosti, Antonella; Grimes, Pearl E.; De Padova, Maria Pia

ISBN-10: 3540212795

ISBN-13: 9783540212799

A fully illustrated text, this atlas is an ideal reference tool for dermatologists dealing with cosmetology. In the first part the peeling techniques are displayed in a step-by-step manner with an exhaustive text supporting the illustrations; in the second part different diseases are discussed in their pathogenesis and treatment options. Each author then provides his/her personal experience and treatment approach with different peeling techniques for acne, rosacea, melasma, photoaging, postinflammatory hyperpigmentations and dark skin.
