

Management of Thyroid Cancer and Related Nodular Disease

This authoritative, readable volume covers all aspects of thyroid cancer.

Source: Springer Science+Business Media

Author(s): McDougall, I. Ross

ISBN-10: 1852339659

ISBN-13: 9781852339654

The text, covering all aspects of thyroid cancer, is supplemented with many illustrations including pathology, thyroid and whole-body scans, ultrasounds and other nuclear medicine and radiological studies and highlights important questions that patients should ask their physicians, indicating the topics the physician should cover.

The text is designed for physicians, including primary care doctors, endocrinologists, nuclear medicine physicians, general and head and neck surgeons, oncologists and radiation oncologists. It is expected that patients with thyroid cancer would find this a substantial resource. Other groups are residents, medical students, and nurse practitioners researching a patient-related problem.
