

DeVita, Hellman, and Rosenberg's Cancer: Principles and Practice of Oncology

Acclaimed by the worldwide medical community as "a staple reference text in the medical oncologist's library" (JAMA), "DeVita, Hellman, and Rosenberg's Cancer: Principles and Practice of Oncology" now in its eighth edition is in full color for the first time; has a new editor, Theodore S. Lawrence, MD, PhD, a radiation oncologist; and two Associate Scientific Advisors, Ronald A. DePinho, MD and Robert A. Weinberg, PhD, with special expertise in molecular biology. More than 40 chapters are entirely new, and more than 70 have been rewritten by new contributing authors.

ISBN-10: 0781772079

ISBN-13: 9780781772075

The text provides cutting-edge, practical information on the science of oncology and the multimodality treatment of every cancer type. To ensure a balanced, multidisciplinary approach, each major treatment chapter is co-authored by a surgeon, a medical oncologist, and a radiation oncologist. Treatment of each cancer type is discussed by stage, with coordinated guidelines on the role of each treatment modality at each stage. Each major treatment section is preceded by an updated brief chapter describing the molecular biology of the cancer and the implications of molecular biology for patient management. Full consideration is also given to cancer prevention, screening, palliative care, supportive oncology, and quality of life issues.
