

DeVita, Hellman, and Rosenberg's Cancer: Principles and Practice of Oncology

DeVita, Hellman, and Rosenberg's Cancer: Principles and Practice of Oncology has been acclaimed by the worldwide medical community as the standard-setting oncology reference. Its primary goal is to present the practicing oncologist with the practical as well as cutting-edge information needed to ensure the best possible care for each individual patient

Source: Lippincott Williams & Wilkins (LWW)

Author(s): DeVita, Vincent T.; Lawrence, Theodore S.; Rosenberg, Steven A.; DePinho, Ronald A.; Weinberg, Robert A.

ISBN-10: 1451118139

ISBN-13: 9781451118131

The hallmark of this book from its inception and a major reason it has gained worldwide acceptance as the definitive source of cancer information has been its approach to the treatment of cancer patients by stage of presentation with a tightly coordinated description of the role of each treatment modality in the care of individual patients. To ensure a balance multidisciplinary approach, a surgeon, a medical oncologist, and a radiation oncologist author each of the major treatment chapters. Each of the major treatment sections is preceded by an updated, brief chapter describing the molecular biology of that cancer and the prospects this new information holds for the improved management of cancer patients. Greater emphasis has been given in recent editions to the increasing importance of molecular biology and cancer screening and prevention, as well as palliative care, supportive oncology and quality of life issues.

- n --NEW 11 new chapters
- n --NEW 25% new 4-color illustrations
- n --NEW completely revamped art program with new/redrawn pieces of art
- n --Cutting edge information on the science and practice of oncology
- n --Discusses in detail the growing importance of prevention, early screening, and quality of life issues for cancer patients
- n --Exhaustive coverage of combined modality cancer treatment
- n --Greater emphasis on the increasing role of biologic therapy in the treatment of cancer
- n --Over 300 first rate contributors
- n --The single, most comprehensive oncology reference ever published
