

Flow Cytometry and Immunohistochemistry for Hematologic Neoplasms

This text is a detailed guide to the use of flow cytometry, immunohistochemistry, and molecular genetic techniques for diagnosis of hematologic neoplasms.

Source: Lippincott Williams & Wilkins (LWW)

Author(s): Sun, Tsieh

ISBN-10: 078178400X

ISBN-13: 9780781784009

Dr. Sun explains the principles of the techniques for diagnosis of hematologic neoplasms and demonstrates their utility in 39 clinical cases covering all important entities. Each case represents a comprehensive diagnostic approach including a clinical history and flow cytometric, immunohistochemical, and molecular genetic findings.

Abundant full-color illustrations show histologic sections, immunohistochemical stains, bone marrow, peripheral blood, and body fluid smears, and each case includes a complete set of flow cytometric histograms. Over 100 tables compare and differentiate the diagnostic features of similar diseases.
