

Cardiac Nursing

Cardiac Nursing is recognized as "The Red Reference Book" for nurses caring for patients who have, or are at risk for developing, cardiac diseases.

Source: Lippincott Williams & Wilkins (LWW)

Author(s): Woods, Susan L.; Froelicher, Erika S.; Motzer, Sandra A.; Bridges, Elizabeth J.

ISBN-10: 0781792800

ISBN-13: 9780781792806

The book provides both basic and advanced content in evidence-based care and emphasizes health promotion, health maintenance, and disease management. The five-part organization consists of anatomy and physiology; physiologic and pathophysiologic responses; assessment of heart disease; pathophysiology of heart disease; and health promotion and disease prevention.

This edition has a new Global Perspective feature in most chapters, which reflects the rich cultural mix of patient populations and helps to determine appropriate care. A new chapter on Global Health reflects WHO commitments to reducing heart disease worldwide.

There are seven brand-new chapters on inflammation, atherosclerosis, genetics, heart rate variability, complementary and alternative medicine, disease management models, and nuclear and other scans. Boxes of evidence-based content have been added within chapters where appropriate.
