

AGRIS

The international information system for the agricultural sciences and technology, created by the Food and Agriculture Organization of the United Nations (FAO).

Source: Food and Agriculture Organization (FAO)

AGRIS provides worldwide bibliographic coverage of agricultural science and technology literature. Assembled by the AGRIS Co-ordinating Centre, the Food and Agriculture Organization (FAO) of the United Nations, AGRIS offers an international perspective on crucial agricultural research. The many aspects of agriculture, including forestry, animal husbandry, aquatic sciences and fisheries, and human nutrition from over 135 participating countries are covered. Literature includes unique material such as unpublished scientific and technical reports, theses, conference papers, government publications, and more. Approximately 130,000 records are added each year with key words in English, French, and Spanish. The archival discs now cover 1975 through 1990. The current disc covers from 1991 to the present.

- n Unrivalled international agricultural information

Broad Subjects:

Life Sciences

Specific Subjects:

Agronomy

Access Options:

- n Ovid Internet, updated Quarterly
- n SilverPlatter Internet, updated None
