Mental Measurements Yearbook, from the Buros Institute, contains the most recent descriptive information and critical reviews of new and revised tests from the Buros Institute's Yearbooks. The database covers more than 4,000 commercially-available tests in categories such as personality, developmental, behavioral assessment, neuropsychological, achievement, intelligence and aptitude, educational, speech & hearing, and sensory motor.

Each entry includes test name and classification; author(s); publisher, publication date; price; time requirements; score descriptions; levels; and intended populations. Mental Measurements Yearbook is updated every six months to ensure timely access to new test information and to eliminate out-dated descriptions and reviews when new ones are available.

A valuable resource for academic and professional libraries, the Yearbook provides a convenient tool for educators, counselors, psychologists, personnel directors, lawyers, and medical professionals to locate and evaluate testing instruments.
