

PsycINFO®

The essential psychology tool for researchers, practitioners, and students in numerous disciplines, PsycINFO® is an abstract database that provides systematic coverage of the psychological literature from the 1800s to the present.

Source: American Psychological Association

The American Psychological Association's PsycINFO® database is the comprehensive international bibliographic database of psychology. It contains citations and summaries of peer-reviewed journal articles, book chapters, books, dissertations, and technical reports, all in the field of psychology and the psychological aspects of related disciplines, such as medicine, psychiatry, nursing, sociology, education, pharmacology, physiology, linguistics, anthropology, business, and law. Journal coverage, spanning 1806 to present, includes international material selected from more than 2,450 periodicals from more than 49 countries written in 29 languages. Current chapter and book coverage includes worldwide English-language material published from 1987 to present. Over 80,000 records are added annually through weekly updates. More than 36 million references in over 870,000 journal articles, books, and book chapters; retrospective to 2001 and earlier, where available; more than 3.2 million references from 1920 to 2000.
