

CAB Abstracts Archive

Covering the literature from 1910 to 1972, CAB Abstracts Archive makes over 1,860,000 records on every aspect of agricultural science, veterinary medicine, nutrition and natural resources, available electronically for the very first time.

Source: CABI Publishing

The Archive combines 17 printed abstract journals produced between 1910 and 1972 (the equivalent of 600 volumes) into a single electronic database. CAB Abstracts Archive makes accessible important research that has been 'lost', 'forgotten' or 'ignored'. Previously only available in print, this knowledge has in effect been inaccessible to all but the most determined researcher.

CAB Abstracts Archive is fully searchable and has been re-indexed with modern terms to allow today's researcher full and immediate access to the research of the past.

The Archive contains seminal research that will help today's researchers:

- Build on earlier scientific work
- Learn from past mistakes
- Learn from past techniques
- Assess long-term trends and changes
- Access valuable research about rare and infrequent events
- Find 'missing' pieces of research
- Gain insights about the past

The research in the Archive is on the same topics that are of concern today, such as Biodiversity, Pest control, Environmental pollution, Animal diseases (like TB and foot and mouth), Nutrition Food production, Managing natural resources, and Plant and animal breeding.

The following print abstract journals have been fully digitized to form the archive:

- n Animal Breeding Abstracts (1933-1971)
- n Dairy Science Abstracts (1939-1971)
- n Field Crop Abstracts (1948-1971)
- n Forestry Abstracts (1939-1971)
- n Helminthological Abstracts (1932-1971)
- n Herbage Abstracts (1931-1971)
- n Horticultural Abstracts (1931-1971)
- n Nematological Abstracts (1970-1971)
- n Nutrition Abstracts and Reviews (1931-1971)
- n Plant Breeding Abstracts (1930-1971)
- n Review of Agricultural Entomology (1913-1971)
- n Review of Medical and Veterinary Mycology (1943-1971)
- n Review of Plant Pathology (1922-1971)
- n Review of Veterinary and Medical Entomology (1943-1971)
- n Soils and Fertilisers (1937-1971)
- n Veterinary Bulletin (1931-1971)
- n Weed Abstracts (1954-1971)

Broad Subjects:

Life Sciences

Specific Subjects:

Agronomy

Access Options:

- n Ovid Internet, updated None
- n SilverPlatter Internet, updated None
- n SilverPlatter Local, updated None

Other Information:

- n Coverage: 1910-1972
- n Number of Records: 1,860,000

- n Data Type: Bibliographic with Abstracts
