

Biological Abstracts/RRM®

With Biological Abstracts/RRM (Reports, Reviews, Meetings), you can easily discover the critical non-journal coverage you need to prepare research projects, grant proposals and follow trends in the life sciences. Coverage of meetings and conferences, literature reviews, U.S. patents, books, software and other media help you explore relevant disciplines from botany to microbiology to pharmacology.

Source: Thomson Scientific, Inc.

With Biological Abstracts/RRM, you can:

- * Uncover relevant results in more fields of life sciences research than any other source in the world.
- * Explore new applications, techniques and laboratory methods discussed at meetings, months before they are published in journals.
- * Discover emerging trends that help you pursue successful research and grant
- * Survey the state of the art and avoid duplication of effort by exploring relevant patent data.
- * Track competitors' activities.

Every item included in Biological Abstracts/RRM has met the high standards of an objective evaluation process that eliminates clutter and excess and delivers data that is accurate, meaningful and timely.acquisition.

Each year, Biological Abstracts/RRM adds: more than 165,000 citations from more than 1,500 meetings; over 24,000 references to review articles; 29,000 U.S. patents; and 9,000 reviews and references for books, CD-ROMs and other life sciences media.

Broad Subjects:

Life Sciences

Specific Subjects:

Biology, General
