

## Plant Protection Database

***The Plant Protection Database provides access to international scientific literature relating to weeds, pathogens and pests (insects, mites, slugs, snails and vertebrates) of crops, forest trees and plant products, and their control. All kinds of pesticides used in this context, their synthesis, chemistry, formulations, safety and non-target effects are also included.***

*Source: CAB International*

Compiled by subject specialists at CABI Publishing, the Plant Protection Database contains more than 810,000 abstracts and citations, with 25,000 records added annually. Containing over 30 years of research from over 75 countries it provides an ideal source for professionals and students requiring an international perspective on the wealth of information available on crop protection, pesticide research, and the agricultural sciences.

The Plant Protection Database includes over 30 years of information on:

- \* Entomology
- \* Plant pathology
- \* Nematology
- \* Weed science

plus:

Vertebrate pests for the full range of agricultural, horticultural, plantation and forestry crops, and stored products covering the following areas:

- \* Taxonomy
- \* Biology
- \* Physiology
- \* Ecology
- \* Techniques
- \* Pest management
- \* Morphology
- \* Economic thresholds
- \* Geographical distribution
- \* Genetics

**Broad and Specific Subjects:**

n Science

Earth & Geological Sciences- Soil Science, Plant Sciences, Crop Science & Plant Biology, Crop Protection

**Access Options:**

n Ovid Internet, updated Quarterly

n SilverPlatter Internet, updated Quarterly

n SilverPlatter Local, updated Quarterly

**Interface:**

n OvidSP

**Other Information:**

n Coverage: 1973 - Present

n Data Type: Bibliographic with Abstracts

n Records Added Annually: 25,000+

n Print Equivalent: A Range of Abstract and Index Journals from CABI

n Number of Records: 810,000+
