

Oxford University Press Collection

Comprehensive, international coverage of biomedicine

Source:

The prestigious Oxford University Press produces some of the finest biomedicine journals in the world. Now, all of Ovid's Oxford University Press titles have been organized into a single collection, making it easy for information professionals, biomedical researchers, and clinicians to access thousands of important biomedical articles.

Oxford University Press journals are known for their broad, international coverage in biological medicine and fully complement the scope of Ovid MEDLINE®, BIOSIS and EMBASE. Brain has been providing clinicians and researchers with the finest original contributions in neurology since 1877--many of which have gone on to become seminal articles in the field--and has one of the highest citation ratings for neurology journals. Human Molecular Genetics concentrates on full-length research papers covering a wide range of topics in all aspects of human molecular genetics. And the American Journal of Epidemiology is devoted to the presentation of empirical research findings and methodologic developments in the field of epidemiologic research.

n 11 Titles on the BMA Howard Hague List

Journals Included:

Oxford University Press Collection 2007 (OXUP-CS-I07)

Age and Ageing
Alcohol and Alcoholism
American Journal of Epidemiology
Annals of Botany
Annals of Occupational Hygiene
Annals of Oncology
Behavioral Ecology
Bioinformatics
Biometrika
Biostatistics
BJA: British Journal of Anaesthesia
Brain
Brief Treatment and Crisis Intervention
British Medical Bulletin
Carcinogenesis
Cerebral Cortex
Chemical Senses
Continuing Education in Anaesthesia, Critical Care & Pain
Europace
European Heart Journal
European Journal of Orthodontics
European Journal of Public Health
Family Practice
Glycobiology
Health Education Research
Health Policy and Planning

Health Promotion International
Human Molecular Genetics
Human Reproduction
Human Reproduction Update
International Immunology
International Journal for Quality in Health Care
International Journal of Epidemiology
Japanese Journal of Clinical Oncology
Journal of Antimicrobial Chemotherapy
Journal of Biochemistry
Journal of Experimental Botany
Journal of Heredity
Journal of Molluscan Studies
Journal of Pediatric Psychology
Journal of Petrology
Journal of Plankton Research
Journal of Public Health
Journal of the History of Medicine and Allied Sciences
Journal of the National Cancer Institute
Journal of Tropical Pediatrics
Medical Law Review
Molecular Biology & Evolution
Molecular Human Reproduction
Mutagenesis
Nephrology Dialysis Transplantation
Nucleic Acids Research
Occupational Medicine
Plant and Cell Physiology
Protein Engineering, Design and Selection
QJM: An International Journal of Medicine
Rheumatology
Schizophrenia Bulletin
Toxicological Sciences

Broad Subjects:

Clinical Medicine; Behavioral & Social Sciences; Life Sciences; Health Professions

Specific Subjects:

Infectious Diseases; Management & Hospital Administration; Biology, General; Psychology; Epidemiology & Public Health; Education; Geriatrics; Biochemistry & Biophysics; Cell Biology; Allergy & Immunology; Medical Informatics & Library Science; Anesthesiology; Earth & Environmental Sciences; Occupational Therapy; Dentistry & Dental Hygiene; Developmental Biology; Anthropology

Access Options:

 Ovid Internet, updated Random
