Pediatric Anesthesia

Source: Wiley-Blackwell

Author(s): E. Sumner

ISSN: 11555645

EISSN: 14609592

Devoted to the publication of information of interest and importance to practising anaesthetists everywhere, Pediatric Anesthesia aims to be truly international in policy and flavour. The scientific and clinical content of the journal covers a wide selection of medical disciplines in all areas relevant to anaesthesia and intensive care in new-borns, infants and children.

Pediatric Anesthesia has an intercontinental Editorial Board, which is supported by the Editorial Advisory Panel of recognized experts from around the world, to ensure that the journal is publishing the best work from the front line of research in the field. In addition to top-quality scientific and clinical research papers and commissioned commentary articles, there are sections covering case presentations; book reviews; correspondence; reports of local, national and international meetings; and a diary of forthcoming events.
