

American Journal of Transplantation

Published on behalf of the American Society of Transplant Surgeons (ASTS) and the American Society of Transplantation (AST)

Source: Wiley-Blackwell

Author(s): Kirk, Allan D.

ISSN: 16006135

EISSN: 16006143

The journal reflects the field and is an agent for advancing it through critical reviews and news features, consensus documents and guidelines. The journal is directed at scientists and clinicians in transplantation but also at those in other fields who wish to follow transplantation.

The scope is the international discipline of transplantation. This includes organ and tissue donation and preservation; tissue injury, repair, inflammation, and aging; immune recognition, regulation, effector mechanisms, and opportunities for induction of tolerance; histocompatibility; drugs and pharmacology relevant to transplantation; graft survival and prevention of graft dysfunction and failure; clinical trials and population analyses; transplant complications; xenotransplantation; and ethical and societal issues. The sciences includes relevant aspects of cell biology, medicine, surgery, pediatrics, and infectious diseases. The journal includes thoracic transplantation (heart, lung), abdominal transplantation (kidney, liver, pancreas, islets), transplantation of tissues and related topics.
