Molecular Biology & Evolution

Publishes research at the interface between molecular and evolutionary biology

Source: Oxford University Press (OUP)

ISSN: 07374038 EISSN: 15371719

The journal publishes investigations of molecular evolutionary patterns and processes, tests of evolutionary hypotheses that use molecular data, and studies that use molecular evolutionary information to address questions about biological function at all levels of organization. Reports of work on comparative and evolutionary genomics and the evolution of molecular structure and function are particularly welcome.

Collections:

n Oxford University Press Collection

Broad and Specific Subjects:

n Life & Biomedical Sciences

Molecular Biology

n Science

Genetics & Genomics

Access Options:

n Ovid Internet, updated Monthly

Interface:

n OvidSP

Other Information:

n Full Text Coverage: January 2003 to Present

n PDF Coverage: January 2003 - Present
