

Academic Medicine

The official journal of the Association of American Medical Colleges (AAMC)

Source: Lippincott Williams & Wilkins (LWW)

Author(s): Editor-in-Chief: Michael Whitcomb, MD, Senior Vice President, Division of Medical Education, Association of American Medical Colleges, Washington, DC

ISSN: 10402446

Academic Medicine is the oldest English-language journal devoted to the education and training of physicians. It serves as an international forum for the exchange of ideas and information on policy issues and research concerning academic medicine, including strengthening the quality of medical education and training, integrating education and research into the provision of effective health care, enhancing the search for biomedical knowledge, and advancing research in health sciences.

Academic Medicine publishes policy papers, analyses, research reports, and other materials covering a full range of issues facing medical schools, teaching hospitals, academic societies, and health policy agencies. As such, medical schools and affiliated teaching hospital faculty members, senior and chief residents, and fellows will all find Academic Medicine to be an important part of their research library.

AAMC membership includes the 126 accredited medical schools in the U.S., 16 medical schools in Canada, and nearly 400 major teaching hospitals. Its Editorial Board consists of 15 members representing major medical schools from the U.S. and Canada.

- n Impacts how readers perform their roles as educators, through original, peer-reviewed articles.
- n Bases many issues on a special theme, in which all articles and research reports relate to that theme
- n Permits leaders in the academic medicine community to exchange information and ideas
- n Highlights and details innovative programs throughout the world
