Cardiovascular Engineering

An international journal

Source: Springer Science+Business Media

Author(s): Editor-in-Chief: John K-J. Li

ISSN: 15678822

EISSN: 15736806

Cardiovascular Engineering: An International Journal is established as a publishing forum to promote innovative methods and technological advancements in the basic understanding of the cardiovascular system and in cardiovascular diagnosis and treatment applications. Manuscripts are published as Original Contributions that outline new concepts and applications that include the general use of engineering methodologies to, and/or quantitative assessment of, the function of the cardiovascular system.

A forum for debates with supporting documentation is published as Controversies Articles, consisting of articles from two prominent investigators in the field with opposing views.

Technical Notes is published to provide new findings or development of devices or techniques that are of wide interest.
