ISSN: 00185787

Hospital Pharmacy features peer-reviewed clinical information applicable to pharmacists in hospitals and organized health systems, managed care practice, nursing homes, pharmacy schools, long term care, and other settings where state-of-the-art practice information is required.

Turn to Hospital Pharmacy for essential insight into drug and disease state management, recent FDA approvals, medication error and adverse reaction reporting, automation, medical usage evaluation, and governmental regulation.

Because of its focus on high-quality, relevant content Hospital Pharmacy is the most read journal among health system formulary committee members. This focus will continue to be at the core of Hospital Pharmacy's purpos
