Source: Springer Science+Business Media

Author(s): Katharine Palmer

ISSN: 11727047

CNS Drugs is a one-stop shop for all important information about the drug treatment of psychiatric and neurological disorders. The journal takes a bench to bedside approach, covering topics from basic pharmacology and disease pathology to drugs in development and guidelines for clinical practice.

Each issue of CNS Drugs provides:

- \* current opinion/leading articles providing an overview of contentious or emerging issues
- \* definitive reviews on approaches to the management of neurological and psychiatric illnesses
- \* therapy in practice reviews providing practical recommendations for specific clinical situations
- \* Adis Drug Evaluations reviewing the properties and place in therapy of both newer and established drugs in neurology and psychiatry
- \* Adis Drug Profiles reviewing innovations in therapy
- \* selected high-quality original clinical research articles
- \* letters to the editor.
