Heart & Lung: The Journal of Acute & Critical Care

Source: Mosby Publishing

ISSN: 01479563

EISSN: 15273288

Heart & Lung presents original, peer-reviewed articles on techniques, advances, investigations, and observations on acute and critical care. The Journal's expanded focus now includes articles on acute care-critical care provided for a short time, often outside the intensive care unit. Other sections focus on infection control, neonatal nursing, and pharmacotherapy. Many articles provide nurses with a framework for applying research results in clinical practice. Heart & Lung also carries CEU articles.
