The Journal of Antimicrobial Chemotherapy is among the foremost international journals in antimicrobial research. Its readership includes representatives of academia, industry and health services, and includes those who are influential in formulary decisions. Published monthly, the Journal features original articles on the laboratory aspects and clinical use of antimicrobials including antibacterial, antiviral, antifungal, and antiprotozoal agents. In addition to the wealth of primary papers, the journal carries review articles offering in-depth discussion on matters of topical concern. Lively leading articles offer incisive coverage of recent advances and controversies.
