## Endocrinology

---

Source: *Endocrine Society*

Author(s): *Editor-in-chief: Jeffrey S. Pessin, Ph.D*

ISSN: 00137227

Endocrinology, the Society's oldest journal, has defined the science of endocrinology for most of the twentieth century. One of the most authoritative biomedical research journals in the world, it publishes 6,000 pages annually of the highest quality original work ranging from subcellular mechanisms to whole animal physiology. Topics include bone and mineral; growth factors; reproductive/steroids; neuroendocrinology/signal transduction; thyroid; and physiology. The low manuscript acceptance rate of 30% reflects the degree to which it is committed to the highest scientific standard.

### Recommended by:

Brandon/Hill Medical Selection

Listed on the Core Collection of Medical Books and Journals (Hague List)

### Broad Subjects:

Clinical Medicine

### Specific Subjects:

Reproductive Medicine; Rheumatology
