## *Guiding rational therapy in dermatology and appearance medicine*

Source: Adis International

Author(s): Lynda Wiseman

ISSN: 11750561

By providing a regular program of independent review articles covering important issues in the management of dermatological conditions, particularly the place in therapy of newer and established agents and procedures, the American Journal of Clinical Dermatology provides you with information on the most up to date treatment techniques. The American Journal of Clinical Dermatology also publishes original research focusing on the clinical applications of pharmaceutical treatments.

The American Journal of Clinical Dermatology promotes rational therapy and disease management within the disciplines of dermatology and appearance medicine. It provides a regular program of independent review articles covering important issues in the management of dermatological conditions, particularly the place in therapy of newer and established agents and procedures.

- n Leading/current opinion articles providing an overview of contentious or emerging areas and key regulatory and ethical issues
- n Definitive reviews on a broad range of topics relating to the management of dermatological conditions
- n Therapy in practice articles covering optimum management of specific conditions
- n Pictorial diagnosis and treatment articles where illustrations are used to portray clinical findings and techniques
- n Adis Drug Evaluations reviewing the properties and place in therapy of both newer and established drugs
- n Adis Drug Profiles reviewing innovations in diagnosis and therapy with expert commentaries
