Journal of Clinical Periodontology

The Journal of Clinical Periodontology conveys scientific progress in periodontology to those concerned with application of this knowledge for the benefit of the dental health of the community.

Source: Wiley-Blackwell

ISSN: 03036979

EISSN: 1600051X

The journal addresses itself primarily to clinicians, general practitioners, and periodontists, as well as to teachers and administrators involved in the organization of prevention and treatment of periodontal disease. The Journal publishes original contributions of high scientific merit in the field of physiology and pathology of the periodontium, diagnosis, epidemiology and prevention and therapy of periodontal disease, review articles by experts on new developments in basic and applied periodontal science, advances in periodontal technique and instrumentation, and case reports which illustrate important new information. The language of the journal is English, but all articles are published with summaries in German and French.
