Plant Journal, The

Source: Wiley-Blackwell

ISSN: 09607412

EISSN: 1365313X

Publishing the best original research papers in all key areas of modern plant biology from the world's leading laboratories, The Plant Journal provides a new and dynamic forum for this ever growing international research community. Advances in the enabling technologies of biochemistry, molecular biology and molecular genetics are now providing the answers to fundamental questions of cellular organization, protein function and gene regulation that are vital to the advancement of our understanding of plant biology. The Plant Journal is committed to bringing together all the disciplines necessary for understanding key issues in plant biology: molecular genetics, biochemistry, cell biology, developmental biology, molecular pathology, physiology and botany.

Broad and Specific Subjects:

n Science

Earth & Geological Sciences- Plant Sciences

Access Options:

n Ovid Internet, updated Semi-Monthly

Interface:

n OvidSP

Other Information:

n Full Text Coverage: January 1996 - Present

n PDF Coverage: July 2000 - Present
