A quick, user-friendly diagnostic reference text on oral and maxillofacial histopathology for general pathologists, dermatopathologists, and ENT pathologists regarding oral and maxillofacial disorders

Comprised of six compact chapters, the atlas contains the most common as well as unusual entities that are submitted by surgeons working in this anatomic area. The defining diagnostic histopathology is presented by means of carefully selected images and captions, in addition to a brief outline of the demographic information and histopathologic differential diagnoses. Pitfall problems in diagnosis are also discussed and resolved.
