Clinical Scenarios in Surgery: Decision Making and Operative Technique

Presents 125 cases in all areas of general surgery: GI, breast, hepatobiliary, colorectal, cardiothoracic, endocrine, vascular, trauma, pediatric, critical care, and transplant.

Each case begins with a patient presentation and proceeds through differential diagnosis, diagnosis and treatment, surgical procedures, postoperative management, and a case conclusion. Each case includes key technical steps, potential pitfalls, and take-home points.

Key Features:

- 125 cases covering all areas of general surgery
- Created and edited at the University of Michigan, one of the top departments in the country
- Full color for presentations of pathology, radiology, and procedure
- Each case includes key technical steps, potential pitfalls, and take-home points
