## Color Atlas & Synopsis of Clinical Ophthalmology: Retina

Rely on Ovid as the trusted solution that transforms research into results

This updated Retina volume provides authoritative information on the diagnosis and management of vitreoretinal diseases, ideal for practicing ophthalmologists, retinal specialists, and residents.

Developed at Philadelphia's world-renowned Wills Eye Hospital, the Color Atlas and Synopsis of Clinical Ophthalmology series covers the most clinically relevant aspects of ophthalmology in a highly visual, easy-to-use format. Vibrant, full-color photos and a consistent outline structure present a succinct, high-yield approach to the seven topics covered by this popular series: Cornea, Retina, Glaucoma, Oculoplastics, Neuro-Ophthalmology, Pediatrics, and Uveitis. This in-depth, focused approach makes each volume an excellent companion to the larger Wills Eye Manual as well as a practical stand-alone reference for students, residents, and practitioners in every area of ophthalmology.

#### Key Features:

Updated terminology for conditions such as vitreomacular traction, as well as updates on anti-VEGF therapies with new agents and indications. More than 400 superb illustrations, including higher resolution spectral domain OCTs and high resolution digital fundus photos. An easy-to-use format that covers Epidemiology and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and Special Examinations, Diagnosis, Prognosis, and Management.

Publication Year	2018
