This updated Retina volume provides authoritative information on the
diagnosis and management of vitreoretinal diseases, ideal for practicing
ophthalmologists, retinal specialists, and residents.

Developed at Philadelphia’s world-renowned Wills Eye Hospital, the
Color Atlas and Synopsis of Clinical Ophthalmology
series covers the most clinically relevant aspects of ophthalmology in a highly
visual, easy-to-use format. Vibrant, full-color photos and a consistent outline
structure present a succinct, high-yield approach to the seven topics covered by
this popular series: Cornea, Retina, Glaucoma, Oculoplastics,
Neuro-Ophthalmology, Pediatrics, and Uveitis. This in-depth, focused approach
makes each volume an excellent companion to the larger Wills Eye Manual as well
as a practical stand-alone reference for students, residents, and practitioners in
every area of ophthalmology.

**Key Features:**
Updated terminology for conditions such as vitreomacular traction, as well as
updates on anti-VEGF therapies with new agents and indications. More than 400
superb illustrations, including higher resolution spectral domain OCTs and high
resolution digital fundus photos. An easy-to-use format that covers Epidemiology
and Etiology, History, Physical Examination, Differential Diagnosis, Laboratory and
Special Examinations, Diagnosis, Prognosis, and Management.
