A complete publication of interstitial lung diseases and includes clinical, pathologic, radiologic, and physiologic evaluation of the patient with ILD.

This book provides a basic pathobiology and a complete description of individual disease entities. The book covers a wide array of disorders sarcoidosis, asbestosis, hypersensitivity pneumonitis, drug induced lung disease, connective tissue disease, and pulmonary vasculitis to name but a few. This new edition also features an examination of future potential therapies for interstitial lung disease. Interstitial Lung Disease is divided into three sections. The Clinical Approach section provides the basis for recognizing the key features that allow a specific diagnosis to be achieved. The section dedicated to Basic Mechanisms emphasizes the many advances in genetics and cellular and molecular biology that have greatly expanded our understanding of the biological processes involved in the pathogenesis of the interstitial lung diseases. The third section titled Clinical Entities describes the clinical manifestations, radiologic patterns, histopathological features, and management of the specific process.

Publication Year: 2010
Edition: 5th
Author/Editor: Schwartz, Marvin I.; King, Talmadge E.
Publisher: People's Medical Publishing House--USA LTD
ISBN: 978-1-607-95024-0
Doody's Star Rating®: Score: 94
Platform: Ovid
Product Type: Book
Speciality: Pulmonary Medicine
Respiratory Therapy
Language: English
Pages: 760
Illustrations: 0
Included In: PMPH USA All Books Collection 2013
PMPH USA Doody's Premier Titles Collection 2014
