Provides a practical guide to the clinical neurological examination, an essential tool in the diagnosis of common and unusual neurological conditions encountered in the outpatient clinic and hospital ward.

* Each chapter covers a different condition and uses a step by step approach selecting those aspects of the clinical examination which are most likely to lead you to the correct diagnosis
* The text is heavily illustrated with clear diagrams
* Tables are used to list the various causes of particular signs
* Key features of the neurological examination which help in reaching the correct
