Writing DNP Clinical Case Narratives: Demonstrating and Evaluating Competency in Comprehensive Care

The book covers important topics such as the development of DNP clinical competencies, performance objectives, utilizing evidence-based practice, a DNP approach to adolescent care, caring for the chronically ill, mental health care, adult health care, and many more.

The main purpose of this book is to provide DNP faculty and students with a reliable and detailed guide to use when implementing a format to document care provided. The case narratives presented in this book differ from the traditional case study format: students delineate all aspects of the decision-making process, identify the evidence that supports the decision, discuss the robustness of the evidence, analyze the effectiveness of the clinical decision, and critically reflect on the overall case. This detailed format captures the complexity and details of clinical practice.

Publication Year: 2010
Edition: 1
