Developing Successful Health Care Education Simulation Centers: The Consortium Model

Rely on Ovid as the trusted solution that transforms research into results

Over two thirds of magnet hospitals in the United States use simulation in staff education programs, and many educators have introduced simulation into their nursing and healthcare curricula. This highly practical volume meets a growing need for guidelines on planning, organizing, and implementing a health care education simulation center, using the collaborative and cost effective consortium model.

The book takes the reader step-by-step through the process of building a coalition of key stakeholders, gathering and analyzing data, assigning leadership roles within the consortium, developing a strategic plan, and implementing and sustaining it. Case studies in each chapter provide real-life insight from a successful existing consortium by examining how it operates and highlighting successes, mistakes, and lessons learned.

Publication Year	2011
Edition	1
Author/Editor	Jeffries, Pamela R.; Battin, Jim
Publisher	Springer Publishing Company
ISBN	978-0-826-12954-3
Platform	Ovid
Product Type	Book
Speciality	Health Administration Management Management & Administration
Language	English
Pages	176
Illustrations	0
