Research for Advanced Practice Nurses

The second edition of this award-winning reference on formulating, achieving, and sustaining evidence-based practice (EBP) through clinical research updates all prior content and includes two new chapters on establishing and sustaining an evidence-based practice and environment, and how a research question drives the selection of research design, measurement, and analysis. Also featured are cutting-edge discussions of translational science and interprofessional research plus the contributions of several new authors.

Designed for use by graduate students, clinical administrators, and managers and in DNP programs and in-service education, the text offers practical methods to translate evidence into practice by effectively using and appraising clinical studies. It presents research concepts in a clear, conversational tone and addresses the most current knowledge about how nurses can learn to formulate and achieve EBP as clinicians. From a single study to a meta-analysis, EBP concepts related to patient care are integrated throughout. Clinically relevant examples present ways students and staff can apply knowledge to daily clinical practice through the development, implementation, and evaluation of clinical protocols. Text boxes and web references reinforce information.

New to the second edition:
- Presents new content on translational science and inter-professional research.
- Updates all content from the first edition.
- Includes two new chapters on establishing and sustaining EBT and how a research question drives the selection of a research design, measurement and analysis.
- Presents the contributions of several new authors.
- Features psychosocial and physical data collection and analysis methods.
- Includes guidelines on evaluating research articles, including ethical components.
- Suggests strategies for establishing and sustaining an organizational evidence-based practice.
- Presents primary ways of evaluating cost as a dimension of evidence-based practice.
- Offers appendices with evidence-based practice activities and protocols, and a resource list of relevant websites.

Publication Year: 2013
Edition: 2nd
Author/Editor: Mateo, Magdalena; Foreman, Marquis
Publisher: Springer Publishing Company
ISBN: 978-0-826-13725-8
Doody's Star Rating®: ★★★ Score: 88
Platform: Ovid
Product Type: Book
Research for Advanced Practice Nurses

Speciality: Advanced Practice
