This book, in three volumes, presents a detailed revision of the systematics and taxonomy of the platyhelminth class Trematoda, subclasses Aspidogastrea and Digenea, with keys for the identification of these parasites at the superfamily, family, subfamily and generic levels. The trematodes are parasitic worms infecting all vertebrate groups and include families of significance to human and animal health, with considerable economic impact.

Volume 1 covers the subclass Aspidogastrea and order Strigeida, while the second and third volumes will cover the orders Echinostomida and Plagiorchiida.

Publication Year: 2002
Edition: 1st
Author/Editor: Gibson, David I; Jones, Arlene; Bray, Rodney A.
Publisher: CAB International
Platform: Ovid
Product Type: Book
Speciality: Parasitology and Infectious Diseases, Veterinary Science
Language: English
Pages: 544
Illustrations: 0
