The book brings together internationally renowned contributors from the fields of Psychoanalysis, Neuroscience and Neuro-psychoanalysis to address these questions.

The volume is organized in five clear sections, Motivation; Emotion; Conscious and Unconscious Processes; Cognitive Control; and Development of the Self. With a range of chapters written by leading figures in their fields, it gives the reader a strong flavour of how much has already been achieved between the disciplines and how much more lies ahead. This important new book reveals the intrinsic challenges and tensions of this interdisciplinary endeavour and emphasises the need for a shared language and new emerging fields such as Psychodynamic Neuroscience.
