Provides a detailed summary of the most important trials and studies in cardiology, which have paved the way for breakthroughs in the clinical management of the entire spectrum of cardiovascular disease.

Each chapter is written by a prominent international cardiologist in that particular field, making this book essential reading for all cardiologists and cardiovascular trainees.

The text enables all cardiology trainees to apply evidence-based medicine to real-world clinical scenarios and the management of patients in everyday practice. It can also be used as a revision aid for trainees preparing for in-training assessments and exit exams. For established cardiologists and other allied healthcare professionals with an interest in cardiovascular medicine, this book will act as an easily accessible reference text and a benchmark guide to the clinical trials and developments in basic science and clinical cardiology, from which current patient management strategies have been derived.
