Mental Health and Care Homes

Bringing together both clinical and research perspectives, this book helps those working in the care home sector to deliver high quality care and support to both residents and staff. This important, yet neglected, area is thoroughly reviewed by a range of experts including residents, family carers, staff, researchers, and clinicians.

The book has four sections: ‘the inside view’ which includes several first-hand accounts of care home life; ‘the outside view’ which discusses the regulatory, funding, and legislative context in which care homes operate; ‘mental health and care’, a detailed review of the major mental and other health issues that arise in care homes, as well as interventions and services to offer support; and a section exploring the ‘promotion of health and wellbeing’ including examples of good practice. It concludes by synthesising key themes and setting an agenda for further enquiry.
