Neuroradiology Cases

Covers the field of brain imaging through 192 concise and clinically relevant cases.

This book follows the easy-to-learn case format of question and answer, complete with concise summaries and a generous amount of top-quality images. Following the format of the American Board of Radiology examinations, cases are grouped into three sections: Brain, Spine, and Ear, Nose, and Throat. Within each section, cases are randomly ordered and include challenging examples of common diseases as well as typical examples of less common ones. This collection of cases is ideal for the resident preparing for the boards, the fellow for the CAQ exam, or the radiologist in need of a quick review.

Publication Year: 2012
Edition: 1st
Author/Editor: Eskey, Clifford J.; Pastel, David A.; Vossough, Arastoo
