Part of the Oxford Case Histories series, this volume includes 65 neurosurgical cases covering all core topics specified in the UK Neurosurgical Training Curriculum. Cases are drawn from the following clinical areas: trauma, vascular neurosurgery, tumours, spinal neurosurgery, hydrocephalus and paediatric neurosurgery, functional neurosurgery, and medical problems in neurosurgery.

Revolving around actual patients and the relevant knowledge required in specific situations for decision making in clinical practice (for example, when to operate on a case, when not to operate, balancing risks, which investigations to carry out and in what order), this book will serve as an invaluable educational tool to help trainees, doctors and practising neurosurgeons manage the a wide variety of clinical scenarios encountered in neurosurgery.

Edition: 1st
Author/Editor: Hasegawa, Harutomo; Crocker, Matthew; Minhas, Pawanjit Singh
Publisher: Oxford University Press (OUP)
Doody's Star Rating®: ⭐⭐⭐ Score: 85
