Surgery of the Eyelids, Lacrimal System, and Orbit, second edition is a richly illustrated text of oculofacial plastic surgery, with contributions from over 50 nationally and internationally recognized expert authors. Extensively updated from the first edition, this comprehensive text details the evaluation and surgical management of conditions ranging from basic functional eyelid malpositions to complex aesthetic facial reconstructions. It is an excellent resource for those in training as well as seasoned practitioners wanting to be updated on the newest techniques in eyelid, lacrimal, and orbital surgery. The added section in aesthetic surgery includes both surgical and nonsurgical techniques for facial rejuvenation such as botulinum toxin injections, facial fillers, and chemical and laser resurfacing.

With over 350 figures, the reader will be able to gain an in-depth understanding and step-by-step instruction of basic and advanced oculofacial plastic surgical procedures. The recognized expert contributing authors provide readers with trusted insight into new and advanced surgical techniques.
