Breast Cancer

A trinary periodical designed to provide an up-to-date review of a
dedicated radiation medicine topic of interest to clinicians and scientists
who are involved in the care of patients receiving radiotherapy.

Radiation Medicine Rounds is intended to serve as both a reference and
instructional tool for students, housestaff, fellows, practicing clinicians, medical
physicists, cancer biologists, radiobiologists, and interdisciplinary colleagues
throughout the oncology spectrum. This issue of Radiation Medicine Rounds
discusses the more salient topics surrounding the role of radiation therapy in
breast cancer. The specialty of radiation therapy has increased in complexity over
the years, yet as technology improves, the goal of improving outcomes while
decreasing toxicity remains critical.

Breast Cancer provides the practitioner with a full current overview of the present
best practices and recent research in management of this complex and challenging
cancer.
