With contributions from experts across the United States and Canada, Prostate Cancer details the current management of prostate cancer and reviews new therapies in development for prostate cancer, with an emphasis on castration-resistant prostate cancer (CRPC). Coverage includes discussion of multiple new agents that have been shown to impact overall survival or improve skeletal-related events in metastatic CRPC as well as articles covering new data on screening and prevention, integration of surgery and radiation with newly emerging medical therapies, and coverage of the newest developments in immunotherapy. This book is a valuable tool for clinicians, nurses, researchers, medical students, residents, and fellows.
