Neurologic Complications of Cancer Therapy

Comprehensive coverage of the recognition and management of neurologic symptoms related to cancer therapy.

The book includes sections on systemic therapy discussed by both agent and adverse event. The section on adverse events is particularly valuable to clinicians, allowing them to consult by symptom in cases where multiple agents have been administered and the source of the complication is uncertain. The systemic therapy section includes coverage of immunologic agents, biologics, and targeted therapies. The book also features sections on the complications of radiation therapy, complications of surgery and high-dose chemotherapy, and stem cell transplantation.

Publication Year: 2011
Edition: 1
Author/Editor: Wen, Patrick; Schiff, David; Lee, Euodicia Quant
Publisher: Springer Publishing Company
Platform: Ovid
Product Type: Book
Speciality: Neurology, Oncology
