Leukemia

A valuable tool for clinicians, nurses, researchers, medical students, residents, and fellows.

With contributions from experts across the US and Canada, Leukemia details the current management of different types of leukemia and reviews new therapies in development for various forms of acute leukemia, chronic leukemia, myelodysplastic syndrome, and myeloproliferative disorders. Coverage includes new developments in hematopoietic cell transplantation, leukemia pathology and management, immunotherapy and targeted therapies.

Publication Year: 2011
Edition: 1
Author/Editor: Popat, Uday; Abraham, Jane
Publisher: Springer Publishing Company
ISBN: 978-1-933-86468-6
Doody’s Star Rating®: ★★★ Score: 86
Platform: Ovid
Product Type: Book
Speciality: Oncology
Language: English
Pages: 264
Illustrations: 0
