Production of Plasma Proteins for Therapeutic Use

Sets forth the state of the science and technology in plasma protein production.

With contributions from an international team of eighty leading experts and pioneers in the field, this book presents a comprehensive overview of the current state of knowledge about the function, use, and production of blood plasma proteins. In addition to details of the operational requirements for the production of plasma derivatives, the book describes the biology, development, research, manufacture, and clinical indications of essentially all plasma proteins with established clinical use or therapeutic potential.
