Non-Neoplastic Hematopathology and Infections

An important book for any medical professional interested in non-neoplastic hematology, infections and tissue hematopathology, infectious diseases and tropical medicine, and tropical hematopathology.

Most books on hematopathology are neoplastic in scope and offer little non-neoplastic content. In Non-Neoplastic Hematopathology and Infections, the authors fully describe the hematologic manifestations in tissue and blood of infectious agents, including many rare and exotic diseases found in both Western and Eastern hemispheres, in order to assist pathologists and medical laboratory professionals all over the world in better diagnosing and treating such infections.

Thoroughly illustrated with photographs, tables and text, this book features a wide range of non-neoplastic hematologic disorders, as well as reactive patterns of non-infectious and infectious agents. Comprehensive and state-of-the-art diagnostic materials are described, as are the epidemiology, pathobiology, clinical and pathologic manifestations in blood and lymphatic organs—as well as the approaches to treatment.

Publication Year: 2012
Edition: 1st
Author/Editor: Cualing, Hernani; Bhargava, Parul; Sandin, Ramon L.
Publisher: Wiley
ISBN: 978-0-470-64600-7
Platform: Ovid
Product Type: Book
Speciality: Pathology
Language: English
Pages: 608
Illustrations: 0
